

RP6500

Professional Two-Way Radio

The RP6500 Portable Radio is uniquely versatile and is an essential tool for growing organizations. The radio offers a full menu of advanced signaling features including paging or calling selective radios or groups. Users can also store information such as phone numbers, call lists and radio ID's for easy access. With RELM's latest technology, audio clarity is superb even in noisy surroundings, and the large LCD display is extremely helpful in extensive communication networks and critical situations. The RP6500 is *the* radio of choice.

AT-800

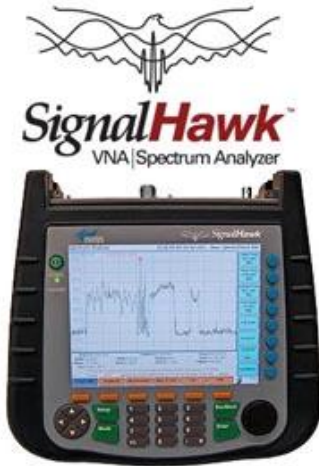

AT-500

806 - 960 MHz, Antenna Tester & AT- 500 2-520 MHz, Antenna Tester

- Rugged, easy-to-use, hand-held design with extended battery life makes it ideal for use in the field, Single frequency readings and frequency sweeps allow for everything from pinpoint tests to system optimization and tuning.
- Tests the system in VSWR, Return Loss, Match Efficiency, or Reflection Coefficient (Rho)
- Can save up to 12 traces for comparison and tracking over time
- RS232 Interface allows communication with a PC for saving traces using the optional software.

The Bird AT-Series Antenna Testers provide a cost-effective, fast, graphical way of determining the quality of mobile and base station antennas.

BIRD Technologies Sets the Benchmark for Value with its New

Handheld VNA Spectrum Analyzer

A new addition to its SignalHawk line of products, the SignalHawk VNA Spectrum Analyzer makes accurate installation, troubleshooting and maintenance of wireless communications systems easy and affordable.
