Dear Valued Customer,

Welcome to the new Multiplier Industries Corp! After 35 years in business, and creation of the #1 name in OEM Quality Portable Power Solutions for the two-way market, Multiplier has been acquired by Uniross Batteries Corp, the world leader in rechargeable power solutions for portable electronics. We have a new management team in place, and a new philosophy on how to partner more closely with you.

Our mission: Provide you with the best solutions to your portable power needs: OEM quality, competitive prices, excellent customer service, expert advice and technical support, and same day shipping.

Multiplier's ISO 9001:2000 company quality certification and Factory Mutual approval for our intrinsically safe batteries, ensure that all of our products meet our strict quality standards. And our Advanced Field Testing Program (AFTP) ensures product reliability in real world, heavy demand usage situations.

We have expanded our product range to meet your power and charging needs for two-way radios, pagers,

flashlights and other wireless devices. Our line of batteries includes OEM replacement, intrinsically safe, and extended capacity batteries, PLUS LMR chargers and a full range of alkaline and rechargeable round cells and chargers.

Our commitment is to provide you with the best solutions. Please feel free to contact us directly with your comments and suggestions. We are at your service.

KEEP IN TOUCH

Your comments are important to us. Please let us know your experience and /or comments using Multiplier's products.

Sincerely,

Craig Taylor, President and CEO

NEW BATTERY PRODUCTS!

NEW BATTERY PRODUCTS!

Alkaline Batteries...for emergency backup and disposable needs

These disposable batteries are manufactured to the strictest standards for performance and durability. Multiplier alkaline batteries are available in AA, AAA, 9V, C and D sizes. Ready to use, these batteries feature advanced longer lasting technology so you can count on them for immediate service or keep them in stock for emergencies.

Rechargeable batteries and chargers...saves money!

Multiplier now offers a complete line of high capacity rechargeable AA, AAA, C, D and 9V sizes. Multiplier's Ni-MH rechargeable batteries are designed to deliver maximum power and longevity to your device, giving you the longest life per charge and maximum capacity. Available chargers include the 2-Hour Speed Charger, 8-Hour Quick Charger, Overnight Charger for AA/AAA and a Universal Charger that can charge all five sizes of rechargeable batteries.

Multiplier Ni-MH Rechargeable Batteries

MAA-REC- AA battery (2500 mAh)

MAAA-REC- AAA battery (900 mAh)

MD-REC- D battery (2600 mAh)

Multiplier Chargers

M2HRCHRGR- 2-hr Speed Charger

M8HRCHRGR- 8-hr Wall Charger

MUNIVCHRGR- Universal Charger

M16HRCHRGR- Overnight Wall Charger

M8HRCHRGR
8-hr Quick Charger

M2HRCHRGR
2-hr Speed Charger

NEW MULTISTATION CHARGING SYSTEM!

Quickly Charge and Condition up to 6 batteries at the same time.

Multiplier's LMR multistation charging system charges, conditions and monitors up to six batteries at the same time. Other features include protection from overcharging and overheating plus a battery top-off capability--no need to deep discharge.

The unique four-phase system for Motorola, Kenwood and other models involves preconditioning, rapid-pulse charge and conditioning, cell balancing and maintenance.

MPSA1- Single Unit & Power Supply 'A'

MPSD1- Single Unit & Power Supply 'D'

MPSD2- Dual Unit & Power Supply 'D'

MPSD3- Triple Unit & Power Supply 'D'

MPSD4- Quad Unit & Power Supply 'D'

MPSD5- Five Unit & Power Supply 'D'

MPSD6- Six Unit & Power Supply 'D'

(cups sold separately to correspond to your specific radio model)

MPSDEXT- SM Extension Unit (power supply and cups sold separately)

TECH Line

Tips for Battery Care & Maintenance

Regular maintenance and conditioning can extend the life of your battery.

Always charge new batteries before use - they come in a discharged condition. For batteries in use, it is recommended that you condition (fully discharge and then fully charge) the battery every 3-4 weeks to help you get the maximum performance from your battery. This is true for Ni-MH and Ni-Cd batteries, but does not apply to Li-Ion, which does not require conditioning. Using the Multiplier Multistation Charging System with its built-in conditioning cycles, can increase life

dramatically.
